**This gun was the most accurate in the test and cost the least.**

*This gun fit the most hands and afforded the highest grip, essential to controlling recoil.*

*The Security Six, at the time of its introduction in 1971, was hailed as an ad-*

*vanced double-action design. Most of the working parts can be removed as a single unit out of the bottom of the revolver.*

*If you are used to seeing a big black rear blade, you will be slower on sight with this arrangement until you learn to use it.*

*The walnut grip is only a brief set of "old-school" panels with the frame exposed all around.*
